1. Claims 22,23,27-30 are under consideration.
2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 22,23 are drawn to a pharmaceutical composition, classified in Class 424 subclass 178.1.
 - II. Claims 26-28 are drawn to a vaccine, classified in Class 424 subclass 184.1.
 - III. Claims 29,30 are drawn to an immunosuppressive composition, classified in Class 514 subclass 885.
3. The inventions are distinct, each from the other because of the following reasons:
4. Inventions I -III are different compositions that have different ingredients and different recited uses. Invention II is a vaccine for stimulating an immune response while Invention III is a composition for inhibiting an immune response. Invention I is a pharmaceutical composition wherein said composition encompasses an immunotoxin not contained in inventions II or III. Therefore they are novel and unobvious in view of each other and are patentably distinct.
5. Because these inventions are distinct for the reasons given above and the search required for any group from Groups I-III is not required for any other group from Groups I-III and Groups I-III have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
7. Papers related to this application may be submitted to Group 1600 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Papers should be faxed to Group 1600 at (703) 308-4242.
8. Any inquiry concerning this communication or earlier communications from the Examiner
